

Xuecang Geng received a B.S. degree in physics from Xi'an Jiaotong University, Xi'an, China, in 1983, a M.S. degree in acoustics from The Institute of Acoustics, Chinese Academy of Sciences, Beijing, China, in 1989, and a Ph. D. degree in material engineering from Pennsylvania State University in 1997.

From 1983 to 1986 he was an engineer at The Center of Microelectronics, Chinese Academy of Sciences, Beijing, China. This work focused on the computer aided design of integrated circuit and the modeling of the IC process. From 1990 to 1993 as a research assistant at the ultrasonic lab of the Institute of Acoustics, he worked on NDT of materials, acoustic wave logging, design, fabrication and characterization of 1-3 piezocomposites for ultrasonic transducer applications. Since 1998, he works as a senior scientist at Blatek, Inc. focusing on ultrasonic transducer design for medical and industrial applications.
